

Szymon Chodzidło

Senior Full-Stack Engineer

Ruby on Rails · Vue.js · TypeScript · Python · Go

SUMMARY

Senior Full-Stack Engineer with 9+ years of experience building and scaling SaaS products using Ruby on Rails, TypeScript, Vue.js and AWS. Experienced in leading engineering teams, designing cloud-native architectures, modernizing legacy systems, and delivering business-critical applications across fintech, healthcare, education and construction industries. Currently expanding into Go and Kubernetes-based distributed systems. Strong focus on clean architecture, testability, and long-term maintainability.

EXPERIENCE

j-labs sp. z o.o. Senior Software Engineer

December 2024 - April 2026 · Kraków, Poland

Worked on an enterprise-grade SaaS platform for sales engagement and revenue operations, serving 200K+ users across global enterprise clients.

- Maintained and stabilized complex legacy systems in a high-traffic production environment, improving reliability through targeted refactoring and proactive incident response.
- Diagnosed and resolved production incidents, ensuring platform stability for Fortune 500 enterprise clients.
- Designed and shipped new product features end-to-end in a cross-functional Agile team, from technical design through production deployment.

Stack: Ruby on Rails, PostgreSQL, Sidekiq, Docker, GraphQL, REST API

Railwaymen sp. z o.o. Senior Full-Stack Engineer

June 2018 - November 2024 · Kraków, Poland

Delivered full-stack SaaS solutions for clients across fintech, healthcare, education, food, and construction sectors.

- Led a team of 5 engineers building a cloud-based platform for daily collection, processing, and management of financial data — owning architecture decisions, code reviews, and delivery cadence.
- Collaborated directly with partners and clients to define technical architectures, translating business requirements into scalable solutions.
- Elevated team code quality through mentoring, pair programming, and establishing testing standards covering unit, integration, and E2E layers.
- Drove migration and modernization efforts on legacy systems, improving stability and reducing technical debt across multiple client codebases.

Stack: Ruby on Rails, PostgreSQL, Sidekiq, Vue.js, React, TypeScript, AWS, GitLab CI/CD

Git · Jira · Figma · Miro

Currently Expanding

Python · Go · Microservices · IaC

Three.js

AI Tooling

Claude Code · GitHub Copilot

ChatGPT · LM Studio

MNS Lab sp. z o.o. Junior Ruby on Rails Developer

November 2017 - April 2018 · Kraków, Poland

Built a REST API for processing and exposing time-series data from renewable energy sources, supporting data ingestion, transformation, and integration with external systems.

Stack: Ruby on Rails, PostgreSQL, InfluxDB, Sidekiq, REST API

Languages

Polish — Native

English — C1 (Professional)

French — A2 (Basic)

Delphi Poland S.A. Junior Data Analyst

October 2016 - July 2017 · Kraków, Poland

Developed Python scripts for processing and analyzing autonomous vehicle data, including labeled video footage used for object detection and tracking.

Stack: Python, NumPy, Pandas, Matplotlib

SELECTED PROJECTS

Evally — Internal HR & Recruitment Platform production · tool

Ruby on Rails · Vue.js · PostgreSQL · Sidekiq · AWS S3

Conceived, architected and led development of an internal SaaS tool for employee skill evaluations and recruitment pipeline management. Features include evaluation templates, candidate tracking funnel, skill ratings, automated email workflows, and a custom parser aggregating candidate applications from multiple job boards and company inbox.

Fintech Invoice Finance Platform (NDA) production · UK market

Ruby on Rails · Vue.js · PostgreSQL · Sidekiq · REST API

Full-stack development on a UK fintech SaaS automating invoice finance for thousands of SMBs. Real-time payment processing, background jobs, integrations with open banking solution, KYC provider and cloud accounting software.

Dance Event Registration Platform (NDA) production · SaaS

Ruby on Rails · Vue.js · PostgreSQL · Inertia.js · Google API

Multi-tenant SaaS for managing dance event registrations. Modular monolith architecture with bounded contexts, dynamic form builder with pricing logic and Google Forms synchronization.

EDUCATION

Mechatronic Manufacturing, Master of Science Degree

University of Science and Technology, Kraków

March 2016 - September 2017

Mechatronic Engineering, Bachelor of Science Degree

University of Science and Technology, Kraków

October 2012 - February 2016
